WordPress Interview Questions

1. What is WordPress?

Word press is the best Open Source CMS which allows it to be used free of cost. You can use it on any personal or commercial website without having to pay a single rupee for it.

2. Do you need to have a blog to use WordPress for a site?

It is not necessary to have a blog to use WordPress. WordPress was originally used as blogging software though it has since become popular for the website also.

WordPress Interview Questions

3. WordPress.com vs WordPress.org – What is the Difference?

The difference is the host. With WordPress.org

✓you host your website; with WordPress.com

✓ they host it for you.

4. Where is the WordPress content stored?

All WordPress content is stored in the MySQL database on Server.

5. What is the Difference between Posts and Pages?

✓ Posts are entries listed in reverse chronological order (the latest appears first).

✓ Pages are static, they are not listed by date, and they don't use tags or categories

WordPress Interview Questions
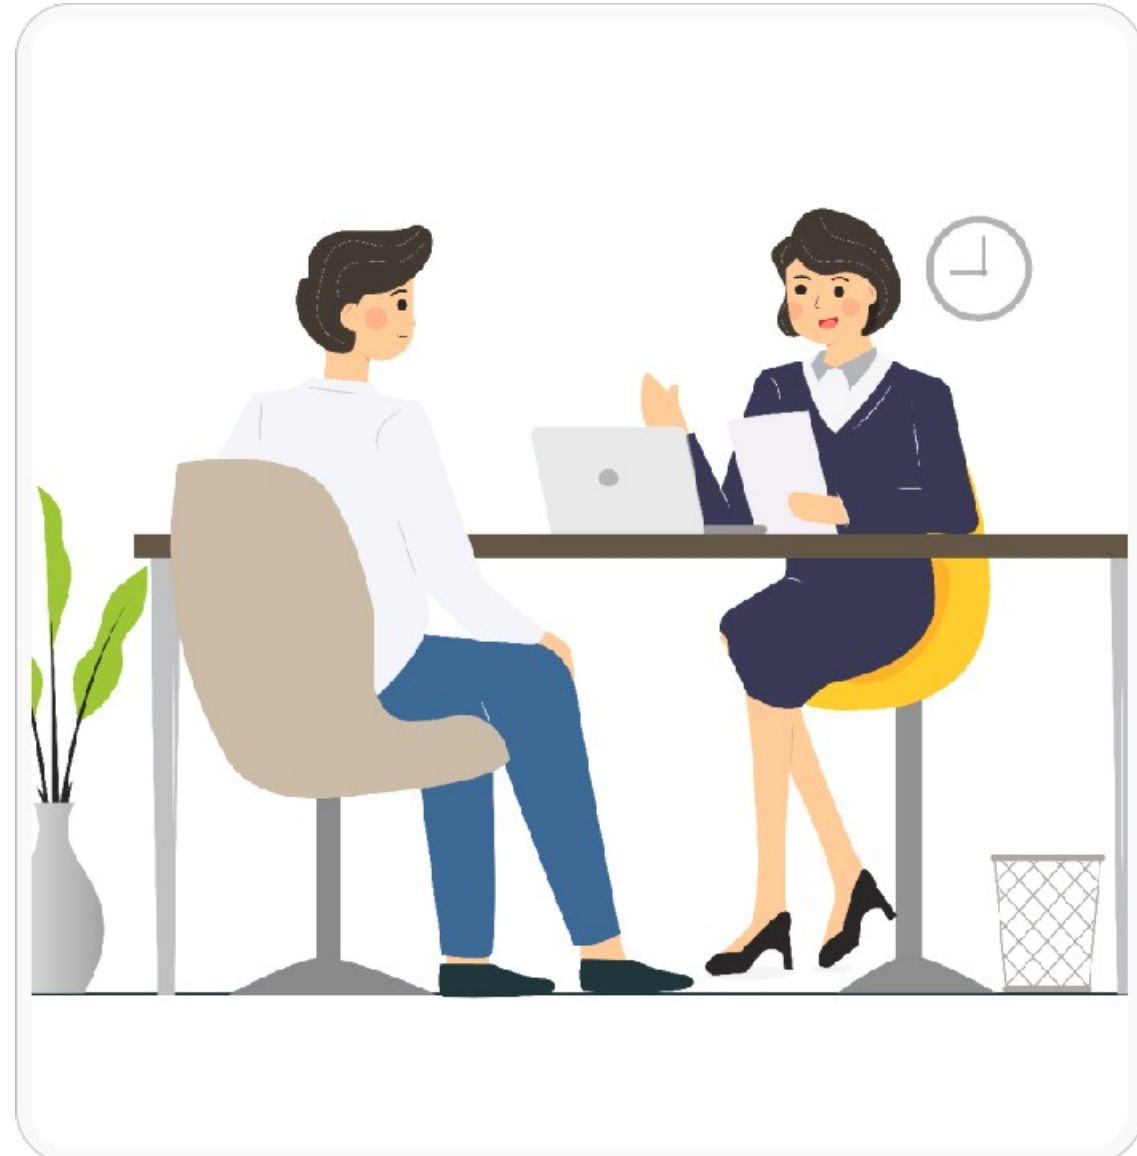

6. Is a Website on WordPress safe?

Yes, your website is safe on WordPress but you should keep your WordPress up to date to avoid hacking.

7. how to develop a WordPress plugin?

You need to come up with a unique name, create the plugin folder with a subfolder for PHP files, create the main plugin file, create functions for activation and deactivation, create an uninstall script and readme.txt files.

8. Is WordPress.com More Secure than WordPress.org? Why?

WordPress.com is considered more secure than Wordress.org because the themes are limited on WordPress.com and installing plugins is not allowed.

WordPress Interview Questions

9. When Should You Not Recommend WordPress to a Client?

You should not recommend WordPress to a client if they are working on a non-CMS based project; if they want complex or innovative e-commerce; in the case of enterprise intranet solutions; if the site requires custom scripting solutions

10. What are Meta-tags?

Meta-tags are descriptions and keywords for displaying website or page information
